

SIMPLY LEARN

A simple platform solution for students with bandwidth restriction to ease their burden

About

Simplylearn is a learning platform that helps students from all over the world to study and interact with their instructors in a much efficient and more comfortable way. Simplylearn helps every student learn faster and efficiently, even with deficient internet connectivity and internet data usage. This platform is open source as well as free to use for educational purpose.

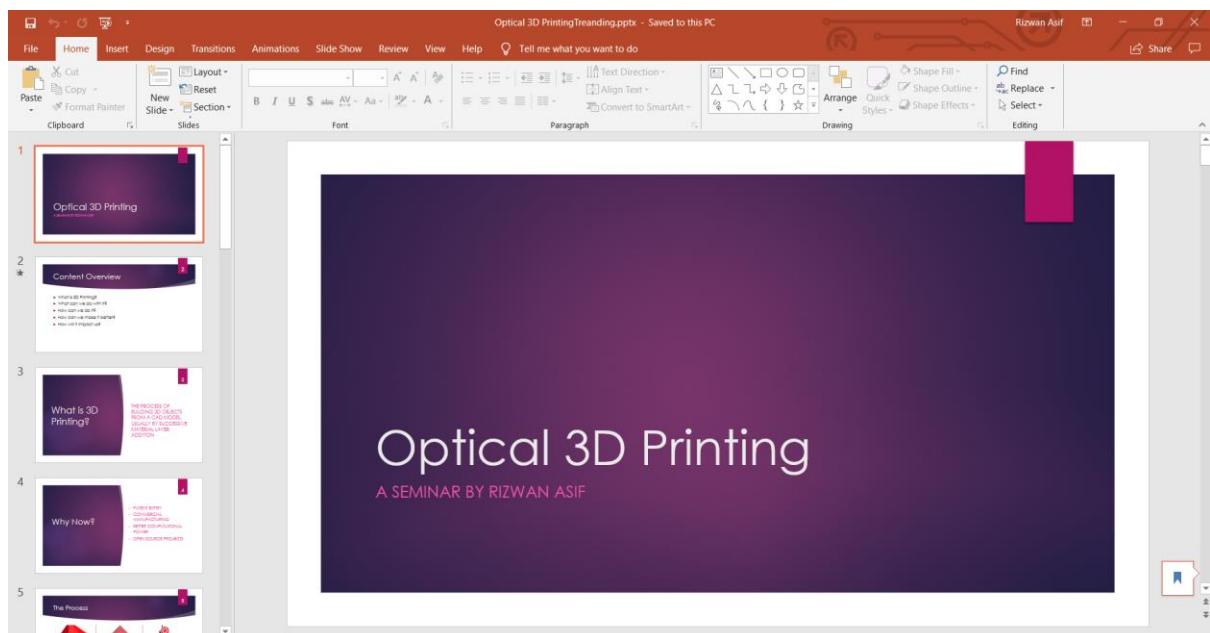

Teachers can schedule class in our platform and share the link generated with the students. The image in teachers window is dynamically synced with the students window in real-time. This gives students a live class like feel while consuming negligible data. For audio students can make use of free call-in services offered by platforms like <https://www.freeconferencecall.com/>.
